JUNCTION 2026 · ASTRAZENECA: EQUAL CARE ACROSS FINLAND · EXA

FirstLine

Shows a wellbeing services county director where the first step of early cancer care breaks in their county, and what to do about it on Monday.

THE PROBLEM

Your area decides how long a GP visit waits.

85.4%

Vantaa and Kerava

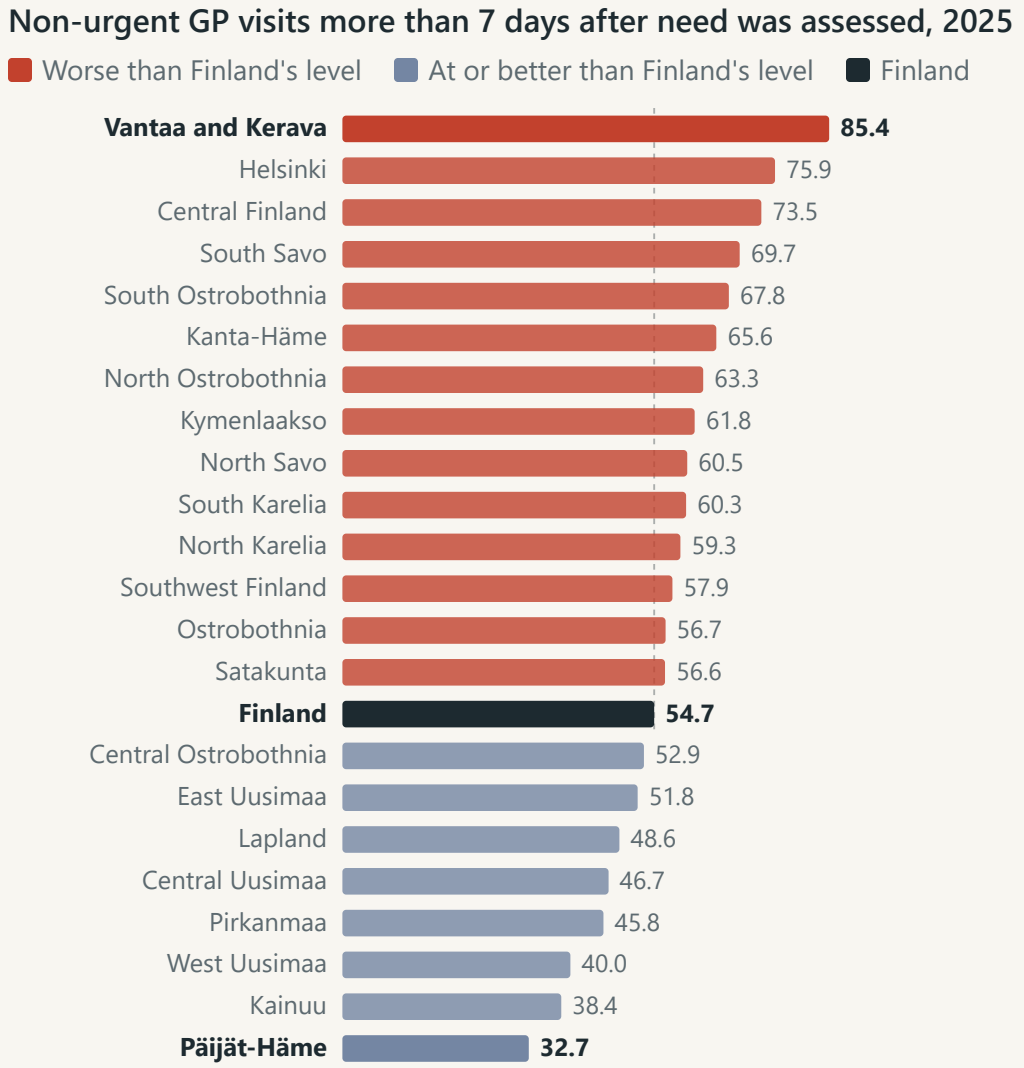

32.7%

Päijät-Häme

Share of non-urgent GP visits that wait over a week. Red means worse than Finland, and Finland itself is at 54.7%.

THL Sotkanet 6411 · 2025

Counts all non-urgent GP visits, not only possible cancer.

WHO IT'S FOR

County directors own the fix. Nobody shows them where their pathway breaks.

Patient
notices a symptom

→

1 Getting to a GP
non-urgent visits waiting over 7 days
Sotkanet 6411 · 2025

→

2 GP recognises warning signs
not measured in Finland
England: 17% of cancers first found in an emergency
NHS England, Fingertips · 2024/25

→

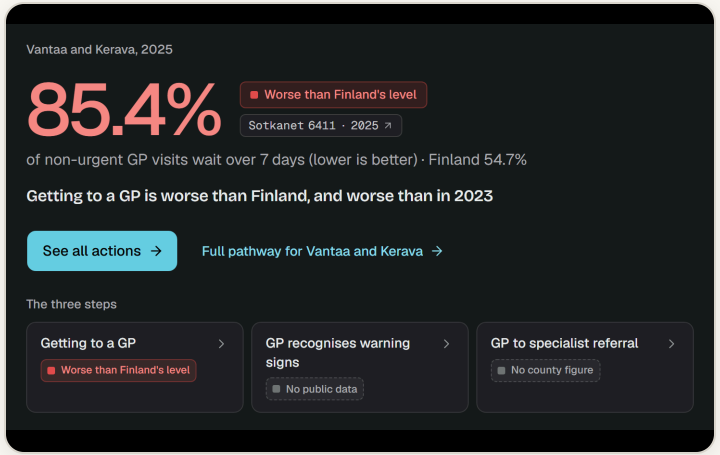

3 GP to specialist referral
referrals processed within 3 days
Sotkanet 13 · 2025

Why the first step matters: lymphoma patients who started at a public health centre waited a median 127 days to treatment; through private or work care, 76. **Kuitunen et al., Cancer Medicine** · 2026

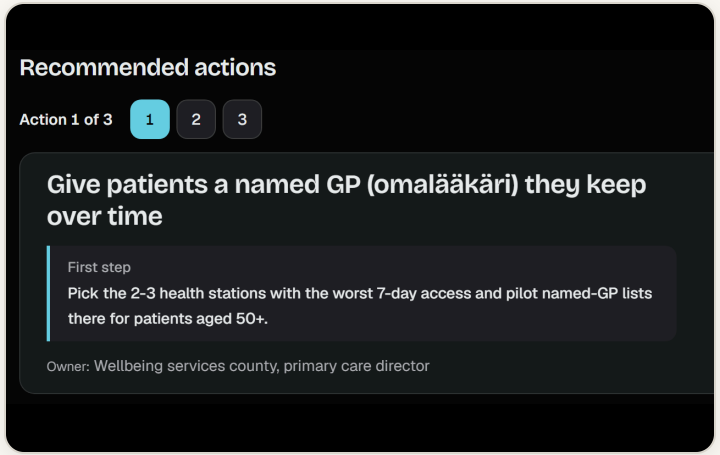

Finland's cancer roadmap asks for stronger GP access (measure 2.5.1). **STM cancer strategy roadmap** · 2026–2031

THE PRODUCT

Three screens: pick an area, find the break, act.

1 Pick an area

Map of 22 areas. One number, one main reason.

2 Find the break

worse | at or better | no data

Three steps, each against Finland's level.

3 Act

Each action: owner, first step, checked source. Plus the four referral routes a county needs.

Live site firstline-finland.vercel.app, 14 Nov 2026, 18:22 Helsinki (commit 3bc8bc7). Also on the site: Compare all 22 areas, Ask the evidence.

ACT ✓ checked evidence

What worked elsewhere, and what didn't.

Fast-track pathways

17 days

faster diagnosis (median), Denmark, after vs before the pathways

Jensen et al., BMC Cancer · 2015

In the app: **South Ostrobothnia**, slow referrals

A named GP

25% lower

odds of dying from any cause, same GP over 15 years vs 1 year (Norway, observational)

Sandvik et al., Br J Gen Pract · 2022

In the app: **Vantaa and Kerava**, action 1

Nurse-led visits

Equal or better

outcomes vs doctors, probably (18 trials)

Laurant et al., Cochrane · 2018

Honest result: Sweden's pathways shortened waits, but regional gaps stayed.

Riksrevisionen RiR 2023:12, via Riksdagen · 2023

TRUST

Every number has a source. Every gap is said out loud.

Source on every number

No source, no row.

THL Sotkanet 6411 · 2025

Limits on every page

6411 counts all non-urgent GP visits, not only cancer. Where recorded visits changed by over 20%, part of a rise may be recording.

Sotkanet 6411 · 2023–2025

AI can't invent numbers

A sentence whose number isn't in its source is removed.

On page: county brief

On page: Ask the evidence

Public data only. No patient data. Decision support, not diagnosis.

LIVE LAYER · EXA

Checked data shows where care breaks. Exa shows what's happening about it now.

✓ Checked evidence

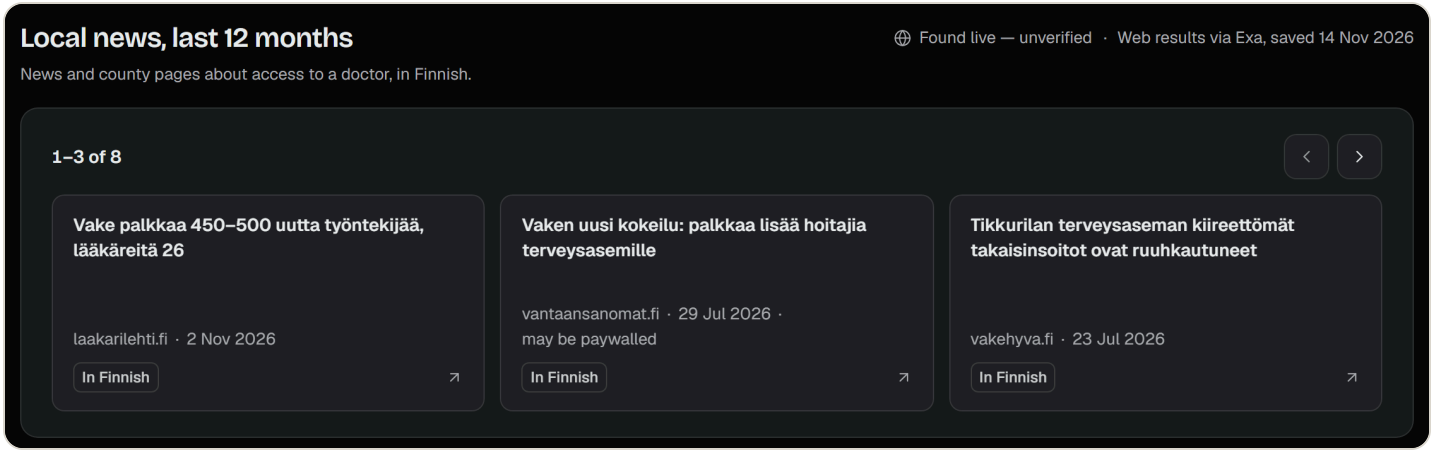

14 actions, each quoted from its source.

FirstLine evidence table · 2026

Ask the evidence: a numbered live source on every sentence, or “nothing found”.

Found live — unverified

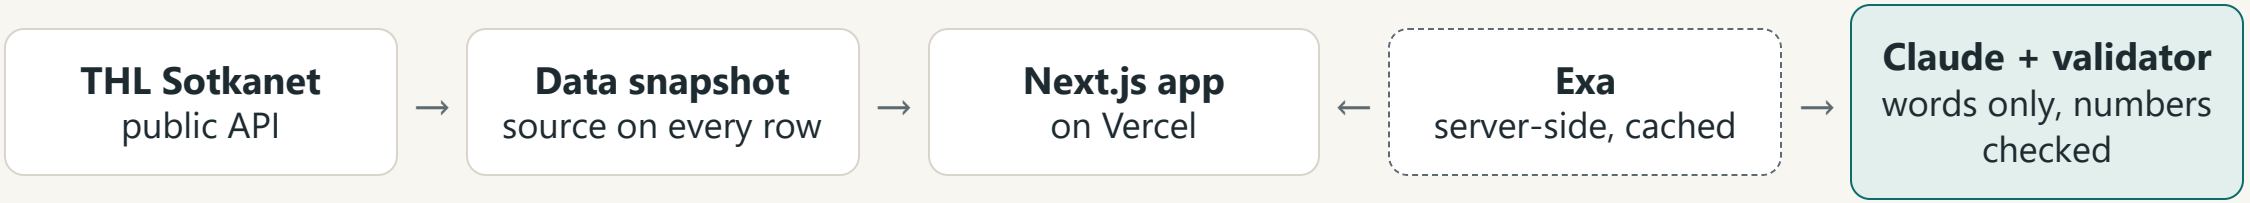

each item dated and linked

Local news, Vantaa and Kerava county page, live site, 14 Nov 2026 (Exa results saved that day).

HOW IT'S BUILT

Public data snapshot first, so the demo works even if a service is down.

Real today

- Home: map, one number, one main reason
- County page: 3 steps, limitations, AI brief, local news
- Act page: actions, what-if, four referral routes
- Compare: ranking, getting worse fastest
- Ask the evidence, national news, sources page
- Live on Vercel; saved results if search is down

Not in public data yet

- Whether GPs spot warning signs (step 2)
- Cancer stage at diagnosis, by county
- First contacts through work or private care

THE ASK

Equal first steps, across Finland.

> Pilot with one wellbeing services county: pick the 2–3 health stations with the worst 7-day GP access and start named-GP lists there for patients aged 50+.
